DVD-C500

1080p Up-Converting DVD Player

FEATURES

1080p DVD Up-scaling
1080p up-conversion takes full advantage of your HDTV by interpolating the resolution of your regular DVDs to full high definition. You can send that signal from the DVD player to your HDTV with just one connection: HDMI. It carries the Full HD signal and delivers surround sound audio information too, all in one convenient connection. Easy to set-up and easily the best pictures and sound you can get.

HDMI™ Anynet+ (HDMI-CEC)
A true "plug and play" product, HDMI™ enables you to connect your HD video and audio with 1 simple cable. The Anynet+ (HDMI-CEC) feature allows you to operate multiple supported HDMI™ products with a single remote control.

High Definition Audio
For the ultimate audio experience in up to 7.1 channels, Samsung Blu-ray players can decode or bit stream Dolby TrueHD and DTS-HD Master Audio. These advanced HD audio formats provide lossless audio that is bit-for-bit identical to the studio master, delivering an extraordinary surround sound experience.

BD Wise
This advanced technology takes DVD up-conversion to the next level with Blu-ray-like video quality. Using 2-way HDMI™ communication, the DVD player identifies supported Samsung HDTVs and the two devices automatically optimize picture settings for the highest quality DVD video.
